WHERE WE ARE

- **Core game shipped & live** — Classic, Dive, Power Dive; 4 creatures; tempo wrapper; PWA + CI + Pages deploy.
- **Finale graphics shipped** — animated creatures, wave title, Fable Currents lab, distant seamount backdrop, rare whale fly-by.
- **Currents program (C1–C6) built** on a branch — 20-pattern catalog, scrolling current cells in Power Dive, a rare whole-screen surge, and a live-tuning sandbox. Default-off, so the shipped game is untouched.

GUARDRAILS HOLDING

Classic golden master green

80k fairness matrix 0 fails

Currents fairness ~98%

Deterministic replays yes

THE ASK

- **Merge PR #2** — zero-risk (currents default-off); unlocks the Catalog + Sandbox at the live URL.
- **Decide the player entry** for currents: a Power Dive toggle vs. a standalone "Currents" mode.
- **Green-light the full 80k currents sweep** before promoting currents to public.

TOP RISKS

MED

Currents fairness proven by 60-seed spot check, not yet the full sweep.

MED

Currents difficulty is escapable but not yet feel-tuned.

LOW · INT

No player-facing currents entry yet (by design).
